

ELIJAH J. WAGNER

Architecture Student
Eagle Scout

MY OBJECTIVE

In relation to the future of my education and career, the first thing I would like to accomplish is the completion of my education in architecture at Kean University, a 6 year program that includes a master's degree. Which, along with 3 years working in the industry and a series of industry tests, are the minimum requirements to become a working architect. Educationally, I plan to immediately continue by seeking a program where I will be able to obtain my doctorate. Professionally, the first thing I plan on doing is finding a good job at an architecture firm in order to gain experience working in the business, since even though I will have gotten my education from schooling, I understand that the actual hands on business aspect will be different. However, I don't want to just stop there, in the future I would like to create better spaces for a sustainable future.

WORK AND PROJECT EXPERIENCE

- **K-Labs**, Michael Graves School of Architecture, Kean University, 2015 – 2016
Participation in several different projects that relate to the Kean community worldwide. This includes working on projects such as. Creating models of campus sites, research and data collection for possible future projects, and then brainstorming and design of said ventures.
- **Westfield Memorial Library Outdoor Sitting Area**, 2015
The design, creation and construction of an outdoor sitting area at the Westfield Memorial Library. The area is relatively low traffic in a flat grassy space. A circular patio is surrounded by three benches, allowing people a nice place to sit outside, which hadn't existed before.
- **Kent Place Summer Camp Counselor**, Summers of 2013 and 2014

EDUCATION

Kean University, Michael Graves School of Architecture, Union, New Jersey

Master of Architecture, projected for 2021
