## Work Experience

### Waitstaff

KC's Korner, May—November 2016

Working in the restaurant industry, I learned how to manage people and work under pressure. While juggling multiple orders, cleaning tables and being responsible for kitchen duties, it was imperative that I always kept my composure and treated patrons with a positive attitude.

### Childcare

August 2014—June 2015

While working as a nanny, I perfected my time management skills and learned that one of my most valuable assets is patience. My responsibilities included keeping two elementary school aged children on a tight schedule to balance their school, activities, and homework. Most importantly, I had to remain a role model for them in every situation.

### Assistant Art Teacher

The Art Lab, May—August 2011

Working as an assistant art teacher, I found that one of my passions is sharing my artistic abilities with others to help them discover their own artistic paths.

## Extracurricular

### Drawing: An Observational Process

ducret School of Art, June 2011

intense study of the human face and anatomy.

### Figure Drawing

Fashion Institute of Technology, June—July 2010

Figure drawing based off of live models in various timed poses.
